L Bracket without Clip, Face Fit

Size: 115mm (L) x 45mm (H)

1.6 Fold Stacking Options

Single Open

(Left or Right Stack) has one wand.

Single: draw and stack folds by moving left or right from the wand side to the opposing side.

- The factory will generally supply 2 x additional fabric folds per opening to be available as spares. This changes to a total of 3 if there are multiple windows of the same height.

Left Hand Side Stack (LS)

Right Hand Side Stack (RS)

Centre Open (CO)

(Split Stack) has two wands with each stack operating independently.

Double: draw and stack the folds using the wands from the centre to the outside points.

- The factory will generally supply 2 x additional fabric folds per opening to be available as spares. This changes to a total of 3 if there are multiple windows of the same height. For Centre Open, an even number of extra folds will be included.

**Please note: with CO the wand control will sit behind the inner folds, minimising the gap.*

Centre Stack (CS)

(Split Stack) has two wands with each stack operating independently.

Double: draw and stack the folds by using the wands from the outside to the centre point.

- The factory will generally supply 2 x additional fabric folds per opening to be available as spares. This changes to a total of 3 if there are multiple windows of the same height. For Centre Stack, an even number of extra folds will be included.

1.7 Wand Length & Colour

Below is the standard wand length for Veri Shades.

Blind Drop	Wand Length
Up to 999mm	500mm
1000mm – 1799mm	750mm
1800mm – 2499mm	1100mm
2500mm – 3499mm	1500mm
3500+mm	2000mm

Wand Colours Available
White
Ivory
Light Grey
Grey
Black
Metal Navy

Note: Wand Colours will be matched as close as possible to the Fabric Colour. Please see reference chart for more details.

1.8 Motorisation

Veri Shades are available with the option for motorised tracks which are called Motionblinds. Motionblinds is only available in white and in widths of up to 6,000mm. We offer a battery-operated track or a hardwired track.

Battery-operated

Stacking Options:

- Right
 - Left
 - Centre Opening
-
- Rechargeable battery
 - Up to 6,000mm long
 - Phone App or Remote control operated (**5 channel remotes available on request and incur a surcharge**)

Note: The Veri Shades Motionblinds Motor will always be installed on the left side of the Track at the back.

Note: Battery Operated Motorisation is not recommended for Widths over 4,000mm and Heights over 3,600mm.

Note: Rechargeable Battery Operated still needs an accessible powerpoint to charge the battery.

Note: Battery Operated Motorisation is not recommended for larger Widths & Heights.

Note: The Maximum size for Motionblinds is 18m².

For example, with a Maximum Width of 6,000mm the Maximum Height would be 3,000mm.

Hardwired

Stacking Options:

- Right
- Left
- Centre Opening

- Up to 6,000mm long
- Phone App or Remote control operated (**5 channel remotes available on request and incur a surcharge**)

Note: The Veri Shades Motionblinds Motor will always be installed on the left side of the Track at the back.

Note: Hardwired will require an electrician.

Note: The Maximum size for Motionblinds is 18m².

For example, with a Maximum Width of 6,000mm the Maximum Height would be 3,000mm.

2. Measuring

2.1 Recess Fit

Recess Fit

- ✓ The Veri Shades are to be installed in the recess or reveal of the opening.
- ✓ When measuring in a recess it is important to measure both the width and the drop at three points (*please see below*). The reason for taking three measurements in each direction is to allow for any problem that may occur if the window is out of square. The **smallest measurement is the one that is required**.

Width Measurements

Measurements taken at the top, centre and bottom of the opening and the **smallest of these three measurements will be the width measurement**.

Drop Measurements

Measurements taken from the left, centre and right sides of the opening and the **smallest of these three measurements will be the drop measurement**.

You can also take your own measuring deductions if you wish. Ensure that you supply the finished **ACT** (Actual Size) on your order/worksheet. If you would like the factory to make the allowances mark your order **NAM (No Allowances Made)** and the factory will make standard industry deductions.

2.2 Face Fit

Face Fit

- ✓ The Veri Shades are to be installed on the face/outside surface or architrave surrounding the window.

Width Measurement

Measure from the outside edge to the outside edge of the architrave across the width of the window. On a window opening where there is no architrave or window surround, be sure that you measure your Veri Shades® 100mm above the window opening and that you extend 50mm either side to ensure that light gaps are minimised.

Drop Measurement

Measure vertically from the top of the architrave to the bottom of the architrave, or to the desired finished length. Where the window is not a full-length window, the width and drop measurements are taken as the finished or actual size of the Veri Shades®.

You can also take your own measuring deductions if you wish. Ensure that you supply the finished **ACT (Actual Size)** on your order/worksheet. If you would like the factory to make the allowances mark your order **NAM (No Allowances Made)** and the factory will make standard industry deductions.

2.3 Deductions

Reveal Fit		
Track Type	ACT Height Deduction	NAM Height Deduction
Decorative	65	80
Standard/Cube	50	65
Motionblinds Motorised	50	65
Face Fit		
Track Type	ACT Height Deduction	NAM Height Deduction
Decorative	70	85
Standard/Cube	55	70
Motionblinds Motorised	55	70

3. Ordering Process

All orders for Veri Shades **MUST** be submitted electronically using the latest version of the Custom Made Veri Shades Order Form.

References to the Veri Shades Order Forms will be made throughout this manual. If you do not have the latest version of the Custom Made Veri Shades Order Forms, please contact your Sales Coordinator or email info@pacificwholesale.com.au to request a copy today.

5. Installation Guide

Please refer to link below to access our Veri Shades Installation Guide & Programming Instructions:

<https://verishades.com/portal>

Alternatively, you can scan below QR code to access this on your phone;

6. Bay & Corner Windows

There is a large variety of options that can be supplied for windows with special requirements. Some of these include: Bay Windows and Corner Windows.

Every requirement is different due to the product type and the application. This section will help to outline the details and special requirements needed to manufacture these types of blinds.

6.1 Bay Window Allowances

Face Fit

When measuring a bay window, it is important to measure the width hard into the corner for all three blinds. You will also need to take the angle measurement. When ordering, be sure to indicate each blind clearly on the worksheet and order them as NAM, so the necessary deductions will be made by the factory. To avoid chain control tangling, it is suggested that the controls for Blind A and C are placed on the outside of the window, and for Blind B ensure that there is a suitable fixing point for the safety cleat on a mullion/skirting board.

Recess Fit

There are two options when measuring in a window recess.

Front of Recess

Note: Bay windows can also be measured with the blinds placed at the front or back of the recess.

Back of Recess

Note: If the blinds are not clearly marked NAM (*No Allowances Made*) it will be assumed that the sizes given are finished sizes.

6.2 Bay Window Order Form

The below Bay Window worksheet can be found on our order form.

Please make sure this form is completed when ordering this window type.

				BAY WORKSHEET							
<i>Please check all the necessary information is on the Order before submitting.</i>		STORE NAME:		0

Room Location	Product	Recess /	Allowance	If Recess: Front/Back	Angle (°)	Measurements (mm)					
						A	B	C	D	E	Drop

6.3 Corner Window

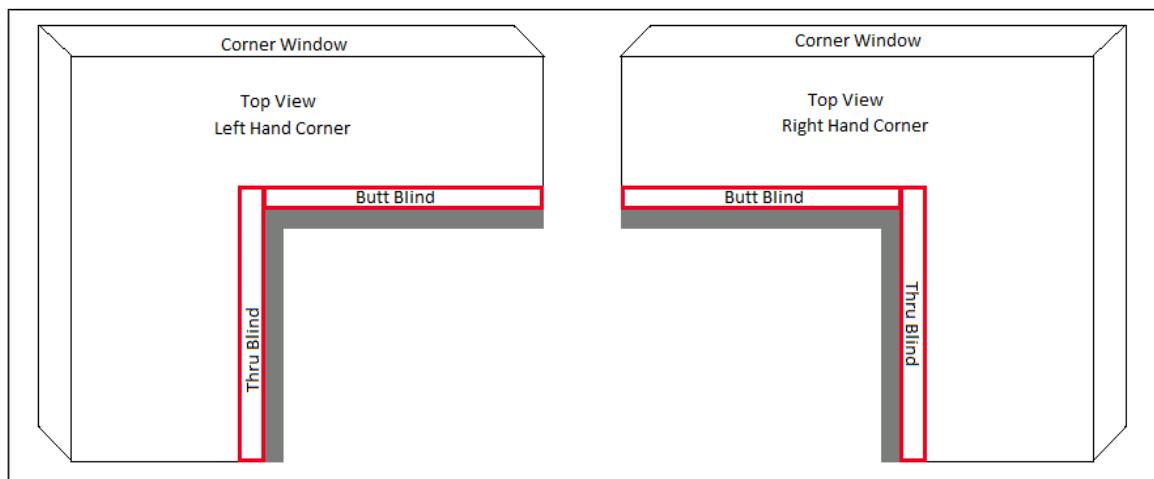

When measuring into a corner it is important to measure the width hard into the corner for both blinds. One blind will then become the *“Thru”* and the other the *“Butt”* blind. When ordering please indicate which blind is the *“Thru”* blind NAM and which blind is the *“Butt”* blind NAM, so the factory can make the necessary deductions. To avoid the controls tangling it is suggested that the controls are not placed in the corner of the window.

Recess

There are two options when measuring in a window recess.

Front of Recess

When measuring at the front of the recess, measure the width hard into the corner and the factory will take appropriate deductions required to allow for the *‘Butt’* blind. Be sure to clearly note on the corner diagram worksheet which is the *“Thru”* blind and which is the *“Butt”* blind.

Back of Recess

Check for any obstructions to the blinds when placing them at the back of the recess. Also, please indicate which blinds are the “*Thru*” and “*Butt*” so the correct deductions can be taken by the factory.

6.4 Corner Window Order Form

The “Thru” and “Butt” window worksheet can be found on our order form. Please make sure this form is completed when ordering this window type.

7. Remake Process

In the event of a Custom Made Veri Shades being received with a defect, the following information must be emailed to your Sales Coordinator or email info@pacificwholesale.com.au

1. A copy of the original order form.
2. A new order form, clearly showing the Veri Shades that need remaking. Please specify that the order is a **remake** – failure to do so may result in the original order being placed as a new order at full charge.
3. A detailed description specifying exactly what the concern is and exactly what line item or component needs remaking. Failure to clearly specify this information may result in a longer lead time.
4. Supporting photographs illustrating any concerns.

8. Care and Maintenance

Proper care and maintenance will increase the life of your investment.

The surface of Veri Shades fabric and tracks will collect a layer of dust over time.

Veri Shades® fabric can be lightly hand washed and dried and can also be ironed with a cool iron or steamed to remove creases.

Veri Shades® tracks can be cleaned with a feather duster, or a slightly damp microfibre cloth to ensure the components are also dust free.

At least twice a year (or more in high-risk environments), silicone spray should be used to lubricate all the track gears. Before spraying the tracks, remember to slide your Veri Shades fabric over to one side or cover to avoid any overspray.

If spraying insecticides or any harmful chemicals the blinds must be placed in a raised position. These chemicals **must not** come in contact with the blinds.

CAUTION:

Never use harsh cloths, harsh abrasives, chlorine or ammonia-based chemicals or cleaners on any Veri Shades surface as they may affect the appearance, longevity and warranty of the product.
